# Feature Update Release

(For Student)

Update in Notifications from 20 to 50

Before, students could only view up to 20 notifications on the notification bar at a time. Therefore, if they received more than 20 notifications in a short period of time, all of them would not be displayed at once, thus making it likely to be missed. But with the most recent upgrade, students will now be able to view up to 50 notifications at once.

My Platform Activities

'My Platform Activities' displays students' activities on the platform in both a Simplified and Detailed View. It displays student's activities such as if they purchase a subject or generate a test paper. Students can also use filters to view their activities of a particular time frame. Additionally, they can also view their activities relating to specific features like eBooks, assignments, etc.
